

**Anne Marie Hoffman**  
**Life Scientist (Biologist)**  
**U.S. Environmental Protection Agency**

Anne Marie Hoffman is a Scientist with the U.S. EPA's Federal Facilities Restoration and Reuse Office. She is the office Lead on the revitalization and reuse of remediated Federal facilities as well as strengthening partnerships with state regulators. Ms. Hoffman also specializes in Green Remediation and efforts to decrease climate change impacts from U.S. EPA waste programs.

Prior to joining U.S. EPA Headquarters, Ms. Hoffman served in two positions in EPA's Region 4 Atlanta office. Most recently, as a Remedial Project Manager, she directed the remediation of hazardous waste Superfund sites in the states of Kentucky, Tennessee, South Carolina and North Carolina. Previously she served as the EPA Program Manager for Tennessee in the Ambient Air Quality program, maintaining and improving air quality in Tennessee. Ms. Hoffman has participated in various EPA research projects including the Everglades South Florida Ecosystem Assessment and the AVARPS Ocean Coral Study as a member of the US. EPA Dive Team.

Ms. Hoffman enjoyed working for the U.S. Peace Corps in Nicaragua for two years as an Environment Promoter. She received her Bachelors of Arts in Biology from Colgate University.
