## **DEFENSE CRITICAL ELECTRIC INFRASTRUCTURE**

Distribution Grid | Community | Bulk Electric System | Bulk Generation

5	Component Community	Dual	irement -Benefit ilience	Analysis Tool All Hazards Analysis
Utility-own	<b>Example Project</b> ed, on-installation pov	wer plant that	Impact Bulk Generation	Benefit Dual-Benefit
supports fl	supports flightline operations and has excess power to support civilian loads			
	Second transmission line to mission substation that directly supports flightline operations			Mission-Only
	Grid-tied, large scale solar field on installation that does <i>not</i> provide resilience to base			Community-Only

## Defense Critical Infrastructure Program (DCIP)

DoD grant from the Office of Local Defense Cooperation

Extends beyond the fenceline and states, counties, cities, munis and co-ops can apply

Tier I: Quality of Life Tier II: Resiliency Tier III: Military value at installation

funding for FY 2021, likely increasing

\$60 million in

Own/operate infrastructure inside the installation or supporting it
