

SPECTRA SHIELD™ 9500

Effective Respiratory Protection

Surgical N95 Respirator with Embedded Antibacterial Performance

The SpectraShield™ 9500 Surgical N95 respirator mask is an FDA cleared and NIOSH approved antibacterial N95 healthcare particulate surgical respirator that is protected by the patented, safe, natural and effective Fossshield® antimicrobial technology.

Features and Benefits:

- **Regulatory:** FDA 510(k) cleared, NIOSH approved
- **Performance:**
 - Begins microbe prevention immediately and eliminates 99.99% of the following tested bacteria after one hour of contact with the surface of the respirator:
 - Methycillin Resistant Staphylococcus Aureus (MRSA)
 - Streptococcus Pyogenese
 - Haemophilus Influenzae
 - Proven effective in independent testing for long-duration shifts
- **Protection:**
 - Offers healthcare workers the best possible protection available from a respirator
 - Shields from blood, other bodily fluids, and a wide spectrum of airborne respiratory threats
 - Meets CDC and WHO guidelines for Tuberculosis and other infectious disease exposure control
 - Hypoallergenic
- **Design:**
 - Single use and disposable
 - Unique construction naturally contours to facial features for a guaranteed proper fit
